SUMMARY

Founder's Office generalist owning the technology layer of a Retail-as-a-Service business , sales data pipelines, internal operating platforms, AI systems and IT infrastructure. Ships production systems that replace external dependencies and put live commercial data in front of leadership.

EXPERIENCE

Business Automation Lead, Founder's Office *Sept 2025– Present*
***LiteStore**, Bangalore, India*

- Architected an orchestrated sales pipeline (n8n, SFTP, POS APIs → PostgreSQL) that ingests every store's data with no human input, reaching **~98% automation** of monthly aggregated sales as a single auditable source of truth.
- Deployed an unattended daily/weekly/monthly reporting engine serving **100+ partner brands** across the FLXY and THE RACK formats, absorbing the operations team's full reporting workload with no downtime.
- Built a central operations dashboard (Next.js, Prisma, PostgreSQL) spanning store sales, lease commercials and MBO performance, with auto-computed PSFPD and a store-level Gross P&L used by Finance and leadership for renewal and exit decisions.
- Automated recurring invoice generation integrated with **Zoho Books** to replace a licensed platform, plus a validation layer flagging duplicate transactions and missing sales dates.
- Delivered an end to end lease module holding terms, month-wise commercials and executed agreements for every store, replacing an externally procured tool.
- Shipped a **RAG** based legal assistant for lease and revenue-share agreements on AWS Bedrock (Supabase pgvector, multi-agent), and ran two org-wide Generative AI workshops now embedded in Design and Marketing workflows.
- Deployed Snipe-IT for organisation-wide IT asset tracking, replacing a paid subscription with an auditable register covering assignment, custody and status.

Software Developer Intern *June 2025 – Aug 2025*
***LiteStore**, Bangalore, India*

- Built the core data structure and a live store-portfolio dashboard, automating sync to Google Sheets and cutting data latency by **90%** via API-driven updates.

Software Developer Intern (Automation) *Apr 2025 – June 2025*
***Incentiv**, Remote*

- Built end-to-end social media automation in n8n, Make and Lindy with AI-generated creatives, plus auto-scheduling and cross-platform distribution, cutting time-to-publish by **~70%**..

Front-End Developer Intern Jan 2024 - May 2024
***RSL Soft Tech Pvt. Ltd,** Indore, India*

- *Gained hands-on experience in the MERN stack; implemented secure JWT authentication and authorization mechanisms for client projects.*

FELLOWSHIP & CERTIFICATIONS

Founder's Office Fellowship — Charter *Apr 2026*
Graduated the Founder's Office Fellowship

EDUCATION

Shri Vaishnav Institute of Information Technology (SVVV) *2020 – 2024*
B.Tech, Computer Science Engineering · CGPA: 8.09, *Indore, India*
Shri Vaishnav Academy *2018 – 2020*
Higher Secondary (78.6%) & High Secondary (83%), *Indore, India*

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Java, C++
Stack: Next.js, React, Node.js, Prisma, PostgreSQL, Supabase (pgvector), Docker
Cloud & AI: AWS (EC2, S3, Bedrock), n8n, RAG & multi-agent systems, Zoho Books, Google Workspace.
